Exporting Genetics Timeline

1

Health Requirements

Overview of health requirements for genetic entry (Please note, testing requirements vary by country)

2

Animal Testing

Pre, during, post collection (Please note, testing requirements vary by country)

3

Animal Quarantine

Animals will stay at RSG headquarters located in Lebanon, IN for the duration of their quarantine time slot.

4

Genetic Collection

RSG offers reproductive services to help collect and utilize high-quality genetics, including semen collection and freezing and laparoscopic artificial insemination (LAI).

5

Export Permitting

RSG works with American Genetics as a trusted shipping and permitting partner for the import and export of livestock genetics. Their team serves as a valuable resource throughout the process, helping navigate permitting requirements and coordinate the shipment of genetics between countries.

6

Delivery to Hub

Genetics will be transported from RSG to an airport shipping hub located in Chicago, IL.

6

International Shipping

RSG works with American Genetics as a trusted shipping and permitting partner for the import and export of livestock genetics. Their team serves as a valuable resource throughout the process, helping navigate permitting requirements and coordinate the shipment of genetics between countries.
